

Very effective and rapid action:

- in vitro kill-off after 5 min

EU **regulatory approval** as medical device (class I)

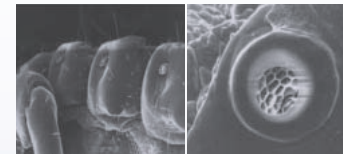

Free of insecticides or essential oils

- mechanical mode of action
- no risk of insect resistance

Patent applied for

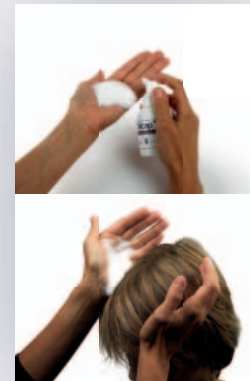

Human safety trials

- no contact irritation or eye irritation

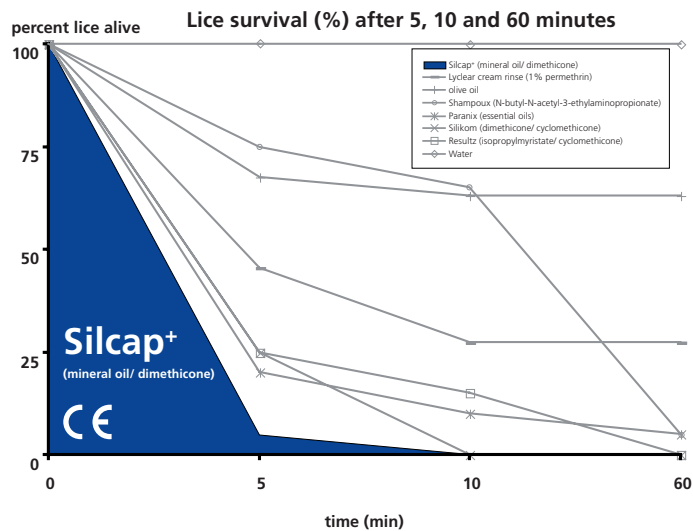

Physical Mode of Action:

Silcap⁺ contains a mineral oil distillate and dimethicone. It penetrates the abdominal spiracles of lice and covers the honey comb structure: the oxygen diffusion stops within minutes.

Superior consumer benefits:

- foams, directly applicable on dry hair
- in handy dispensing pump
- makes nit combing easy
- odourless
- completely innocuous
- highest quality manufacturing (GMP)
